From Poland, Wroclaw.

About

I am a **WordPress** developer who creates websites using technologies such as **HTML**, **SCSS**, **Gulp**, **JavaScript**, **PHP** and **WordPress**. [I also suggest you check out my portfolio](). I have been involved in providing technical support for websites, including content editing and fixing minor bugs, for a technical high school. I am interested in information technology and its impact on business transformation. Recently, **UI/UX** design has become my hobby.

Skills

HTML5, CSS3, SCSS, TailwindCSS, RWD, JavaScript, AJAX, jQuery, PHP, Figma, Git, WordPress, SEO, Gulp, English - B1, Ukrainian - native, Polish - B2, Russian - C2

Experience

WordPress developer at technical high school TerraNova

August, 2023 — present
I am responsible for administering the website, editing, and adding new content. Currently, I am working on developing a website project to improve its aesthetics and architecture to increase performance and optimize for SEO.
Stack: WordPress, Html, Css, JavaScript, Gulp, Scss, Figma.

Full-Stack developer at PaidWork

April, 2024 — May, 2024 (Practice)
At PaidWork, I was responsible for fixing minor bugs, improving the website's styles, and refactoring code.
Stack: PHP, AJAX, JavaScript, Html, Css, Scss, Figma.

Education

September 2021 — present
Programming Technician, TerraNova Technical High School

Experience prior to professional development:

September 2022 — August 2023
I was involved in running a business in the real estate rental industry. My responsibilities included seeking clients, residential properties, as well as handling documentation, translations, and communication between clients and property owners.
